

The MEYER high performance Fork Positioner can hydraulically adjust the forks from the driver's position. Its robust design provides excellent visibility and an optimum fork lift truck residual capacity. The Shaft Guide Concept with solid material hard-chromed shafts and long-life bushings ensures a clean working environment and fast operation speed with synchronal fork travel. The standard fork truck forks are utilized. Bolt-on forks can optionally be supplied.

The integral valve block sideshift of the type range 6-25 allows for an accurate load positioning within the chassis width, while the chassis stays fixed. Many special designs, also with telescopic forks, are available.

Range: 2500 kg - 10000 kg

Plus:

- Double shaft type fork positioner.
- Accurate fork positioning, thanks to the hydraulic adjustment of the forks within the width of the truck.
- For handling of palletised loads.
- Excellent visibility, strength and versatility.
- Integral side shift.
- Standard lift truck forks can be fitted, without any modification.

Notes:

- Two hydraulic functions required.
- The unit has an integral sideshift.
- ISO arm carriers are fitted with adjustable fork stops for variation in fork widths of up to "K" + 10 mm.
- It is recommended that extra wide forks should be bolted on.
- For use with standard forks (not included in price).
- Arm carriers are predrilled with 3 hole pattern.
- The unit is not suitable for clamping

Options:

- Special widths.
- Non-sideshifting models.
- Load backrest.
- Quick disconnect lower hooks.
- Special drill holes.
- Model with reach forks.
- Bolt-on forks.
- Integral mounting also available on request.

Range: 1600 kg - 10000 kg

Plus:

- Double shaft type fork positioner.
- Accurate fork positioning, thanks to the hydraulic adjustment of the forks within the width of the truck.
- For handling of palletised loads.
- Excellent visibility, strength and versatility.
- Integral side shift with bolt-on forks

Notes:

- Two hydraulic functions required.
- The unit has an integral sideshift.
- Forks are attached to arm carriers and secured with 3 bolts.

Options:

- Special widths.
- Different fork lengths.
- Load backrest.
- Quick disconnect lower hooks.
- Forks secured with 4 bolts
- Special drill holes.
- Integral mounting also available on request.

Model 6-25 A (integral Sideshift)

Range: 2500 kg - 5000 kg

Plus:

- The special Automotive Execution of the MEYER shaft-guided Fork Positioner is designed around the particular demand of the logistic processes in the automotive industry.
- With integral (valve block) sideshift.

Notes:

- Additional hydraulics required
 > one
 > two if sideshift required
- ISO arm carriers are fitted with adjustable fork stops
- Maximum fork section in position
 F1 and F3:
 - 6-2504/05/06 130 mm
 - 6-2510 160 mm

- For use with standard forks (not included in price)
- Arm carriers are predrilled with 3 holes
- Hydraulic flow and operating pressure

Options:

- Other capacities and opening ranges
- Load Backrest
- Quick disconnect lower hooks - ISO II / III
- Special drill holes
- Valve protection (only for Model 6-2504/05)

Range: 2500 kg - 5800 kg

Plus:

- The combination of the proven MEYER fork positioner with quality telescopic forks enable the flexible handling and transport of different load dimensions as well as double deep stacking into racking and loading and unloading of road trucks from one side. The telescopic forks are mounted onto the precision shaft guide of the MEYER fork positioner.

Notes:

- Additional hydraulics required
- > two for the use of fork positioning and telescopic forks
- Hydraulic flow and operating pressure

Options:

- Additional Cost for:
- Integral sideshift including solenoid valve
- Wear and tear protection
- Pallet stop Y1, height 75 mm
- Pallet stop Y2, height 400 mm
- Pallet stop Y3, height 850 mm
- Separate sideshift
